Learjet 35 and 36 Now Have FAA-Approved LED Cabin Lighting Options From PWI

March 19, 2024 – Wichita, KS – PWI has just announced FAA PMA approval for its LED cabin lighting systems for the Learjet 35/35A and the Learjet 36/36A business jet aircraft.

PWI LEDs cabin lighting systems are complete plug-and-play lighting packages that are ready to install straight out of the box. No aircraft modifications are required. Customers can look forward to 100,000 hours of no-maintenance cabin lighting. PWI's LED cabin light system eliminates the side effects created by high-voltage fluorescent lights.

The new LED system installation reuses the original aircraft lighting wiring, matching the original cabin lighting configuration. The PWI LED cabin lighting system uses 4,000K neutral white color temperature LEDs that are powered by the aircraft-supplied 28 volts. No power inverters are needed.

"There are several hundred dedicated Learjet 35 and 36 owner/operators that are very excited to see continuing support for this aircraft - in production for 20 years. A good run by any measure," said Robi Lorik, PWI President/CEO. "This specific PMA approval is especially

-MORE-

gratifying in that PWI was the OEM cabin lighting supplier to Learjet. I remember back to our first complete aircraft cabin lighting system in 1972,” he reminisced.

The Learjet 35/35A and 36/36A LED cabin light systems have a 3-year PWI warranty.

PWI has been an OEM vendor of fluorescent cabin lights for business jets such as the Dassault Falcon, Gulfstream, Cessna Citation, Learjet and King Air turboprops for decades. PWI FAA-approved LED aviation upgrades can be purchased direct or through our growing authorized dealer and distribution network. For more information, contact PWI at +1-316-942-2811 or contact sales, at sales@pwi-e.com.
