PWI Now Offers Same Day Shipping for Rotables of CCFL Power Supplies

July 2, 2020: PWI unveils a new fixed price, same day shipping option for ten different overhauled CCFL (fluorescent) light power supply units.

“This has been a long time in coming,” says Robi Lorik, President and CEO of PWI. “We were trying to find a way to save time for our customers and this seemed like a logical step. Starting this new program will get them their unit ASAP.” PWI first started manufacturing interior fluorescent lighting systems for aircraft back in 1972. Since then, PWI lighting has been the OEM supplier for use in Falcon, Gulfstream, Citation and Beechcraft King Air as well as other aircraft.

The service will be a three-step process. First the customer calls with the model number of the part as well as a credit card to cover the cost of the replacement. Then, PWI will ground ship the customer a completely overhauled power supply that same day the order is placed. The new program eliminates the previous pricing that could change depending on the condition of the unit. Now one fixed price is set for each power supply. Lastly, the customer has the option of sending in their damaged part in order to receive a \$200 refund. The overhauled unit will then carry the 8130-3 airworthiness approval tag.

“We really wanted to streamline our service,” says Lorik. “It gets our customers their part quickly and easily. Our customers usually want their parts yesterday, so I think the same day service will provide the quick turnaround that customers need.”

There are some stipulations to the same day shipping service. PWI must receive the request before 3pm CST. PWI will only accept credit cards for this transaction, and the shipping cost will be included in the price of the repair as long as it is being shipped domestically. International shipping and extra costs related to requests for expedited shipping, will be added to the price of the unit. Lastly, PWI must receive the non-functional unit within 30 calendar days of the sales invoice in order to qualify for the \$200 refund. All overhauled units have a warranty of 12 months.

The new same day service applies to the following ten fluorescent lighting power supply units:

Part Number	Price after Refund	Part Number	Price after Refund
6900053-000 or 28S-40CC-4	\$1400	6900054-031	\$1050
6900053-001 or 28S-40CC-4A	\$1400	6900112-000	\$1050
6900054-003	\$1190	6900113-003	\$805
6900054-004	\$1050	6900115-000	\$1050
6900173-000	\$1050	6900053-010	\$1400

Customers who have questions or would like to order a same day shipped unit are invited to call 316-942-2811, email cynthia@pwi-e.com or visit the website at <https://pwi-e.com/products/cold-cathode-fluorescent-lighting/power-supply-service/>

PWI also offers LED lighting to customers who want to upgrade from fluorescent lights to LED lighting. Visit the website at <https://pwi-e.com/led-lighting/> to order LED upgrades.

Established in 1963, PWI has grown from constructing coil winding and magnetometers to designing electrical assemblies, electronics, contract manufacturing, and magnetometers. PWI's also specializes in producing a diverse range of customized aviation lighting, including fluorescent and LED. PWI is a FAA Repair Station and is FAR 145 certified. Aviation products can be purchased through our growing [authorized dealer network](#). All PWI products can be ordered by emailing our sales department at sales@pwi-e.com.
