LED LIGHTING EXTERIOR UPGRADE

PWI's multipurpose LED Ice Light is a safe and powerful alternative to factory installed halogen bulbs. Regardless of outside temperatures, the Ice Light is perfect for use in dusk and night flights or when taxiing and during take-off and landing. The LED Ice Light also reduces radiant heat which can lead to lens warping. The PWI LED Ice Light is a no-compromise solution to overall safety and efficiency that saves money over the life of your aircraft. Ensure your King Air is safe while being visible to others with the LED Ice Light. Check with your PWI authorized dealer for pricing and availability and order your LED Ice Light today.

Be Safe. Be Seen. Be Brilliant!

Be BRILLIANT
