LED LIGHTING INTERIOR UPGRADE

The King Air 300 series is the preference of discerning aircraft owners. The 300/B300/350 aircraft offers outstanding performance, comfort and overall luxury. Consequently PWI's 300 series upgrade offers superior lighting options for a preeminent aircraft. PWI's 300 series King Air LED upgrade is a product of innovative technology and ingenious engineering. This King Air upgrade is more energy-efficient than fluorescent lighting, lasts longer as well as being less expensive over the life of the aircraft. The LED upgrade easily fits into the current fluorescent lighting space. PWI offers two color temperature options, available at the same price. Choose from, Warm White – which is closer to a light bulb and Cool White – which has a hint of blue. PWI's 300 series upgrade is the preferred choice for an exceptional aircraft.
