

# King Air 90/100/200/B200/250 LED Upgrade

▶ 100K Hours Of Life

▶ Ships With Correct Conectors

▶ Standard Dimming

## ADVANTAGES:

- No High Voltage
- 3.2 lbs in Weight Savings
- Reduced EMI Emissions
- 30% Reduction in Operating Current
- Eliminates Buzz of Fluorescent Bulbs

## LED LIGHTING INTERIOR UPGRADE

The King Air upgrade for the 90, 100, 200, B200 and 250 is the result of cutting-edge innovation and superior technology. These LED upgrades feature reduced weight while also increasing the life span and reliability of the lighting system. It's also easily installed and adds the bonus of being much quieter and much more energy efficient than fluorescent lighting. These LED upgrades provide the same warm and inviting light that fluorescents provide, while also being cost effective over the life of the aircraft.
