## LED LIGHTING EXTERIOR UPGRADE

Finally, you can add LEDs to your King Air B300/350 wingtips. STC-approved and a direct fit, form and function replacement.

Get all the light you need to see and be seen by others – on the ground and in the sky. These wingtip lights are five times brighter than bulbs. And you can get rid of those pesky high voltage power supplies.

These LEDs are not only super bright, but they produce far less heat, saving your wingtip lens from warping, crazing and discoloration. And the savings continue by reducing the load on the motors. These wingtip lights feature a whopping 70% lower current draw.

Not a box of parts, this is delivered fully assembled, tested and ready to install. The wingtip is complete with the metal bracket, the LEDs and the wiring harness.

Your King Air 350 deserves the premier LED wingtip lights. Consider the growing family of PWI LED products.
