

FALCON 900B CABIN LED UPGRADE

ADVANTAGES:

- Long life LEDs
- Replaces all fluorescent lights
- Low Power Draw
- Low Heat
- Main Cabin, Galley, Lavatory
- Dimmable

LED LIGHTING INTERIOR UPGRADE

PWI has an OEM solution for upgrading the Dassault Falcon 900B fluorescent cabin lighting to LED. These LED lights are PMA approved and use the aircraft wiring already in place for a true plug-and-play, direct replacement installation. PWI lights require no soldering or aircraft modifications.

This 42-light LED kit is direct replacement for the upwash and downwash lighting that make the 900B cabin so inviting. PWI cabin LEDs dim using the original aircraft controls or any third-party cabin management system. There are no complicated apps to download, learn and update.

Get the long LED life, low power draw and the OEM experience you need for a beautifully refreshed cabin with PWI LED lighting. Finish the cabin refresh with PWI LED Reading Lights.
