

KING AIR 90/100/200/ B200/250 LED UPGRADE

ADVANTAGES:

- Plug and Play
- STC Documentation Included
- No High Voltage
- 3.2 lbs in Weight Savings
- Reduced EMI Emissions
- Eliminates Buzz of Fluorescent Bulbs

LED LIGHTING INTERIOR UPGRADE

The King Air upgrade for the 90, 100, 200, B200/250 is the result of innovation and technology. These LED upgrades feature reduced weight and increased the life span and reliability of the lighting system. It's also easily installed while being much quieter and much more energy efficient than fluorescent lighting.

These LED upgrades provide the same warm and inviting light that fluorescents provide, while also being cost effective over the life of the aircraft.
