

LED LOGO LIGHT

ADVANTAGES:

- PMA Pending
- Plug-and-Play Installation
- Very Long Life LED
- High Light Output
- Low Power Draw
- Accurate Color
- Bracket Included

Aircraft Compatibility:

Beechcraft
King Air 90 series, 200 series, B200/250,
300, B300/350 and Beech 1900 Series

LED LIGHTING EXTERIOR UPGRADE

Beech King Air and 1900 owners/operators will enjoy the PWI LED external lighting option for the Logo Light bulb.

The PWI LED Logo Light replaces the bulb that illuminates the vertical tail surface. Often a company name, logo, or other organization identity is visible there.

With twice the light output as a bulb, this very long life and bright LED delivers the illumination performance customers expect.

Beyond promotional value, the LED Logo Light also provides much-needed illumination of the side of the aircraft. Usually only a tail beacon and part of a wingtip light are visible from the side, and the LED Logo Light will significantly add to the aircraft's visibility.

Replaces light A70828.
