### **Ice Light Windows Capture FAA PMA Approval For Beechcraft King Air, 99 Airliner and 1900 Aircraft**

**November 08, 2022 – Wichita, KS** – PWI has earned FAA PMA approval for its two Ice Light windows for King Air and Beech 1900 aircraft. Mounted on the outside of each engine nacelle on these twin-turboprops, the Ice Light Window provides an outlet for the Ice Light to illuminate the leading edge of the wing for visual ice detection.

The PWI Ice Light Window is a direct replacement for the original window and is priced at \$249.95 USD. Replacement windows are often a remedy for the deterioration caused by the high heat produced by an incandescent bulb ice light.

There are two designs – a square window and a notched corner window. These two designs enhance the King Air 90, 100, 200, 300; 99 Airliner and 1900/1900C aircraft. There is a complete list of the approved serial numbers on the PWI website:

A new window not only enhances ice detection, but also facilitates additional aircraft visibility when viewed from the side, regardless of weather. These two new windows represent a simple update that adds safety to any mission.

PWI also has manufactured a PMA-approved LED Ice Light which produces far less heat, is brighter and uses less power than incandescent bulb products. Replacing both the window and

**-MORE-**

the ice light often makes sense for charter, airmed and other special missions aircraft, as well as general and business aviation.

“PWI has complemented our King Air LED lighting product line to include Ice Light Windows. Customers have commented that replacing the window and, adding a new LED Ice Light, is ideal combination,” said Robi Lorik, PWI CEO and President.

PWI is the OEM for King Air lighting, extending a decades long history of OEM lighting fluorescent lights for business jets. Aviation products can be purchased direct or through our growing [authorized dealer network](#). For more information, contact PWI at +1-316-942-2811 or contact sales, at [sales@pwi-e.com](mailto:sales@pwi-e.com).
