

CITATION LED STEP LIGHT

ADVANTAGES:

- Polycarbonate design for durability
- Long life, low power draw
- Enhanced safety during boarding and exit
- Liquid/debris intrusion resistant
- Eases passenger and cargo loading
- No unsightly scuffs, cracked or dirty lens

Aircraft Compatibility:

Cessna Citation 550 Bravo, S/II; III; Excel; V

INTERIOR UPGRADE

Welcome passengers into the cabin of your Citation Bravo, S/II, Excel, III or V with updated LED Step Lights.

PWI is the OEM supplier of Citation Step Lights and this upgraded LED version delivers superior performance. All of our LED designs provide a long life and very low power draw.

The very rigid polycarbonate design spreads light across the steps. The new design seals out contaminants such as de-icing fluid, water, and debris for a no-maintenance installation.

Whether you transport passengers or cargo, low light conditions are far less challenging with the Citation LED Step Light in your Citation.

Replaces part number 6900163-000 and Textron part number 1021LIGHT
