

LED STEP LIGHT

ADVANTAGES:

- New polycarbonate lens for increased durability
- Diffuser lens provides a pleasing softer light
- Enhanced passenger and crew safety when boarding and exiting
- Eases loading of passengers and cargo
- Enhance cabin aesthetics – no scuffs, broken/cracked/dirty lens
- Water/chemical intrusion prevention has been enhanced
- Long Life, Low Power Draw, Low Heat

Aircraft Compatibility:

Cessna Citation 550 Bravo, S550, 560, 560XL, 650

LED LIGHTING INTERIOR UPGRADE

Welcome passengers into the cabin of your Citation 550 Bravo, S550, 560, 560XL, and 650 with LED Step Lights from PWI.

PWI is the OEM supplier of Citation Step Lights and this LED version offers many new features that make it better than it has ever been.

Of course, as a PWI LED it has a very long life, low heat, and draws very little power. A new tougher polycarbonate lens diffuses the light in a more pleasant way while illuminating the entry and exit to the cabin. A modified design keeps the de-icing fluid, water, and other contaminants out. Passengers, charter customers, and even cargo have all the light needed to get into and out of the Citation.

PWI LED step light replaces 6900163-000 and Textron part number 1021LIGHT
