## LED LIGHTING INTERIOR UPGRADE

When you want a VIP-level color LED cabin lighting system in any turboprop or jet, think PWI.

The PWI color LED system delivers the business or relaxation cabin experience you want, with the touch of a button. Replace overhead fluorescent lights with a pre-measured, plug-and-play lighting system, using the original aircraft wiring.

Say goodbye to high voltage hum, buzz and flicker with iPad or iPhone-controlled full color cabin LEDs.

Put our more than 50 years of aviation lighting experience to work in your aircraft.

Get a modern color LED look in your aircraft. Install PWI LEDs during the next major inspection or anytime the aircraft is down for other maintenance.
