400A/XP	RK099-109	6910100-038
400A/XP	RK098, RK110 and later	6910100-039

INTERIOR UPGRADE

Turn the 400/400A cabin into the business or work experience your passengers need for charter, special missions, business or pleasure flying.

Eliminate the ongoing maintenance of fluorescent lighting – replacing power inverters and lights. LEDs run on the aircraft 28 volts, so the high voltage issues of electronic interference, light flickering and buzzing are history.

Combine the LED downwash lighting system with PWI PMA-approved LED reading lights to improve the cabin experience.

Put our more than 50 years of aircraft lighting to work in your 400 and 400A today.
