

LED LINEAR LIGHT

ADVANTAGES:

- Ideal for Highly Custom Lighting Designs
- Functional and Decorative Lighting
- 1 Inch Minimum Length
- 4,000K or 5,000K Color Temperature

LED LIGHTING INTERIOR UPGRADE

The LED Linear Light fulfills several design functions including: overhead fluorescent light replacement, accent lights, toe-kick lights, task and area-specific lighting, design/decorative lighting, gallery and lav lights.

The Linear Light product can be applied anywhere in the cabin to realize a completely custom cabin design.

You are no longer restricted to overhead lighting. Expand the lighting design to truly enable areas of the cabin for a variety of uses – from meetings to relaxation to impressive luxury.

It is your aircraft, create an inviting and memorable cabin experience, using the PWI LED Linear Light.
