

# KING AIR/1900 LED WINGTIP LIGHTS

350 Model

90, B200/250, 300 & 1900 Model

## LED LIGHTING EXTERIOR UPGRADE

Finally, you can add LED wingtips to your King Air. STC-approved and a direct fit, form and function replacement.

Not a box of parts, they are delivered fully assembled, tested and ready to install. The wingtip is complete with the new metal bracket and the LEDs (wiring harness included on 350 only).

These wingtips are not only super bright, but they produce far less heat, saving your wingtip lens from warping, crazing and discoloration. And the savings continue by reducing the electrical load on the motor-driven generators. These LED wingtip lights feature a much lower current draw.

Get enhanced visibility on the ground and in the sky. These wingtip lights are brighter than bulbs. And you can get rid of those high voltage strobe power supplies.

Your King Air deserves the premier LED wingtip lights. Consider the growing family of all PWI LED products.

## ADVANTAGES:

- STC Approved
- Brighter Than Bulbs
- Uses TSO-Approved Lights
- Long Life LEDs
- Plug and Play Install
- No Maintenance
- Fit, Form and Function
